Stow Community Transit Service Survey

The Town of Stow is currently undertaking a survey of residents to better understand the public transportation needs in our community. This survey is part of a larger effort to address the lack of public transportation options across thirteen towns between Routes 128 and 495. In light of recent proposals made by the MBTA it is essential to identify the transportation needs of our community. The results of this survey will help us better understand who is currently using public transportation, what they are using it for, where they are going, and if they aren't using it what are their reasons for not doing so. The goal of this larger effort is to find more efficient and cost-effective solutions to providing public transportation to residents, businesses and organizations when and across the thirteen towns.

The online survey can be found at:
www.surveymonkey.com/s/4STOW

Hard copies also available in the offices of the Planning Department and
Council on Aging at the Stow Town Building and Randall Library

On behalf of the Town of Stow, we would like to thank you for participating this informational survey.
